

## Purchasing Laserfiche *(Fiscal year 2017)\**

### Announcing: Newly expanded TAMU Laserfiche Master Agreement

With this expansion of the licensing model, A&M System members can:

- Continue to use the existing shared service
- Manage their own Laserfiche implementations
- Implement one or more shared systemwide solutions including contract management and mainframe output report management
- Take a hybrid approach, implementing shared solutions alongside an individually managed system

### Anticipated Fees for FY2017:

- Shared Service customers as of 9/1/2016 were charged maintenance on the number of licenses held as of 8/31/2016. Additional licenses in FY17 are issued at no charge. Time and materials charges may apply.
- Members joining the shared service in FY17 pay an Onboarding Fee of \$4,995, a \$22.50/license administration fee, and prorated maintenance per license based on an annual rate of \$230/year.
- For independent implementations, there is no license activation charge but a time and materials cost may apply.
- For questions about your implementation, contact the shared service team at the number below.

### Bundled Rates (Storage, Backup and Database):

Number of Images**	Annual Rate per 100 images	Monthly Rate per 100 images
For all image counts	\$ 0.72	\$ 0.06

\* All prices are TAMU System rates. Please contact [laserfiche@tamu.edu](mailto:laserfiche@tamu.edu) for Non-TAMUS or auxiliary rates. All rates are subject to annual review and approval.

\*\* Pricing structure assumes images are standard 8.5"x 11" black-and-white documents at 300 dpi using standard database indexes and a standard backup schedule with one planned restore per quarter.

“ Laserfiche has led us to examine our other business processes, so we’ve automated a variety of other reports and documents. This has reduced—or in some instances even entirely eliminated—printing of paper reports.”

Robert Hensz  
Texas A&M AgriLife Administrative Services
